Kramer Bros. Nurseries

NURSERIES LOCATED ONE AND ONE-HALF MILES EAST OF
UPLAND ON FOOTHILL BOULEVARD, U. S. No. 66

ONTARIO, CALIFORNIA

Terms of Sale

ACCEPTANCE OF ORDERS—We accept all orders on condition that same shall be void should any injury befall our stock from fire, frost, floods, drouth, or any other cause which could not be prevented and over which we have no control.

GUARANTEE—We exercise great care to have our nursery stock true to name; nevertheless it is understood that should any stock prove otherwise, we shall not be liable for any sum greater than that paid us for only such stock as shall prove untrue.

TERMS CASH—All prices payable F. O. B. Ontario, unless otherwise designated.

Description of Nursery and Growing Conditions

One of our nurseries is located in the Foothill Section known as the Orange Belt of Southern California. It is situated on the U. S. Highway No. 66, the main road leading to the East.

At this plant we produce our Iris, Heather, Chrysanthemums, Camellias, Cocos Plumosa Palms, Roses, and such stock as requires a frost-free locality. We have seventy acres devoted to this class of plants.

Our Freesias, Ranunculus and Anemones are grown at our Oceanside Grounds at Oceanside, California.

Visitors are always welcome.

KRAMER BROS. NURSERIES

P. O. BOX 2, ONTARIO, CALIFORNIA

Nurseries located one and one-half miles east of Upland on
Foothill Boulevard, U. S. No. 66.

OCHROLEUCA IRIS

The finest of all Irises for early summer cut flowers. They last a long time with several blossoms 6 inches across coming out in succession. Plants grow from rhizomes out of doors and become more prolific each year without transplanting. Hardy anywhere in the United States.

We have sold as many as fifty thousands rhizomes to single customers, and hundreds are increasing their profits with this item. It has been proved profitable from Seattle to New York, and in the south; a consistent item on the cut flower markets.

	Per 10	Per 100	Per 1000

GERBERAS—JAMESONIA HYBRIDS

	Per 100	Per 1000
Strong divisions, bench size, mixed colors.....	\$ 8.00	\$75.00
Strong divisions, reselected for greenhouse use, mixed....	15.00	125.00

GERBERAS

Long blooming season and heavy production of flowers have made gerberas a good greenhouse item. It only takes a few flowers in a mixed bouquet to put it in the high quality class. Plant our strong divisions in deep benches or ground beds where there is good drainage; plenty of sand and peat. Keep the soil slightly alkaline with lime. Water thoroughly each time but allow the soil to dry out between waterings. Small quantities may be planted in deep lily boxes which may be brought outside in warm weather or in milder climates, the divisions may be planted outside after the danger of frost is over and the clumps brought in to the greenhouse before frost in the fall. Night temperatures should be about 50-55 degrees. You will find over a year period that your planting of gerberas will have paid you well per square foot.

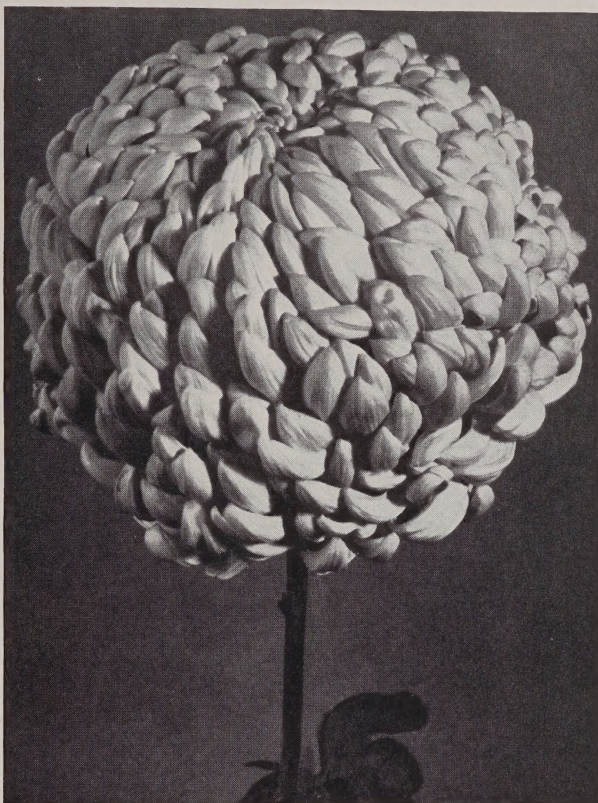

FIELD VIEW OF CHRYSANTHEMUMS

Protected by the beautiful Southern California foothills is this large field of chrysanthemums. We have made every effort to produce and collect the very best commercial varieties available. The location here is ideal for chrysanthemums—for cut flowers, and especially for cuttings. Our plants are grown throughout the year in well spaced rows to provide plenty of air and light so necessary for good cuttings.

Being grown outside all the year around and not forced in any way we cannot begin to ship cuttings until about April 15th which is the normal sprouting season. You may be assured that our outside grown cuttings are clean, strong and vigorous, and well rooted; free from midge and the usual pests. Our customers are assured success. Prices are all quoted net at destination on mum cuttings only, the buyer to pay the express and deduct from the bill. A two percent discount is allowed for payment within ten days.

The safe arrival of shipments is assured by daily ice-cooled refrigerator express service. We guarantee their arrival in good condition and that our stock is true to name—not to exceed the purchase price.

SUNNYSLOPE BRONZE

"A perfect commercial variety of the Major Bonnafon type. The color is a most pleasing shade of golden bronze resembling old gold. It will not fade under any circumstance and the petals will not shatter when packed for long distance shipments. From our experience this flower has the longest keeping quality either for cut flowers or for garden exhibition. It is suitable for growing as a large 'mum as well as a China 'mum. Height medium. Normal blooming period November 1st and on."

Price, \$5.00 per dozen, \$40.00 per hundred.

SUNNYSLOPE WHITE

"This large flower is perfectly incurved ball type of very solid substance enabling long distance shipping without bruising or crushing. We have forced this variety for September flowering under shade. It has long stem and perfect foliage. Surely this is one variety we can recommend to commercial growers without any reservation. Height four and one-half feet. Normally blooms November 20th and on."

Price, \$3.00 per dozen, \$20.00 per hundred.

SUE SALLY JONES

SILVER LACE

BUTTERFLY

PRIDE OF SUNNYSLOPE

JAPANESE SPIDER 'MUMS

SUE SALLY JONES—This lovely flower is of medium size—seven to eight inches across, and is very full and double. The gracefully curved needle-like petals are of clear medium bronze with a slight golden tinge. It is a remarkably good growing variety, and carries the flowers on substantial stems. Blooms November 5. Single plants out of two inch pots are 50c each, per dozen \$5.00, \$25.00 per hundred.

SILVER LACE—Every up-to-date florist should grow a bench of these new Japanese spider chrysanthemums. Your clientele is demanding something different and distinctive which you can supply with such items as these. The varieties now being listed here are much improved in their keeping qualities, production, and general characteristics. Silver Lace is a good full double white, very pleasing. Blooms November 5th. We are now able to offer these at popular prices. \$1.50 per dozen, \$8.00 per hundred, \$75.00 per thousand.

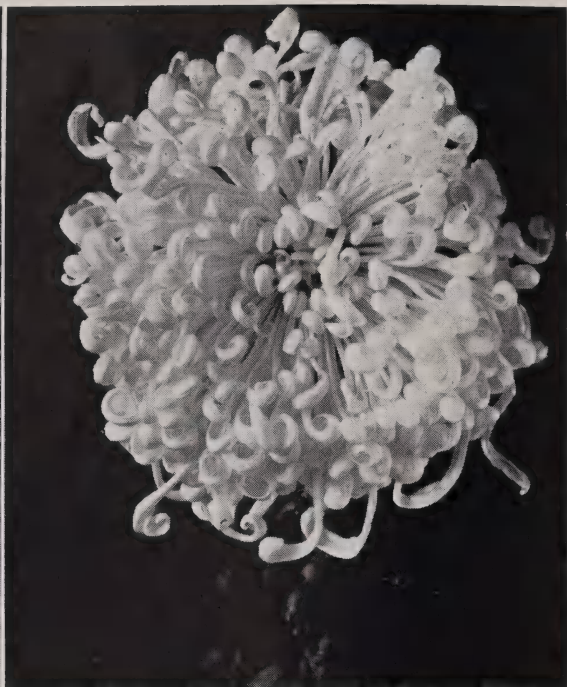

BUTTERFLY—Few in its class compares with this large feathery spider 'mum in production. It may be grown to advantage either as a disbud, or as a pompon. The color is a good golden yellow. Blooms November 5th. \$1.50 per dozen, \$8.00 per hundred, \$75.00 per thousand.

PRIDE OF SUNNYSLOPE—A more attractive form of any 'mum is hard to find. Tall and stately it stands out well amid the usual profusion of flowers at the mid season. Flowers are of deep lavender color. November 5th. We can supply this variety now at \$1.50 per dozen, \$8.00 per hundred, \$75.00

JAPANESE SPIDER MUMS

PEGGY ANN HOOVER

ALICE TASHIMA

MAMORU TASHIMA

SOUVENIR

PEGGY ANN HOOVER—Although this is an old variety of spider 'mum it is still a good one commercially. It grows well and has reasonably strong stems when properly cared for. The long tubular petals are light rose-pink. Blooming date Nov. 5th.

ALICE TASHIMA—This is a pure white flower of long pendulant tubular petals which, when extended, measure from six to eight inches across the flower. It is very delicate appearing, yet it is of good substance and a reliable grower. This variety has kept in perfect condition for more than two weeks after cutting. Especially adapted for corsage work. Blooms Oct. 25th.

MAMORU TASHIMA—Few other 'mums can compare in color intensity of this rich golden yellow flower. It is a medium sized flower and well made up. Not least among its admirable characteristics is its good keeping quality. Blooms October 30th.

SOUVENIER—A full double large quilled type of the beautiful salmon pink shade. It is especially good disbudded and grown three or four to a plant. Grown in this way this flower should make a diameter of from six to eight inches. Stems are strong and rigid. Blooms November 5th.

Plants of the above varieties are at \$1.00 per dozen, \$6.00 per hundred, \$50.00 per thousand, delivered to you.

OUR 1942 INTRODUCTION

ELSIE KRAMER

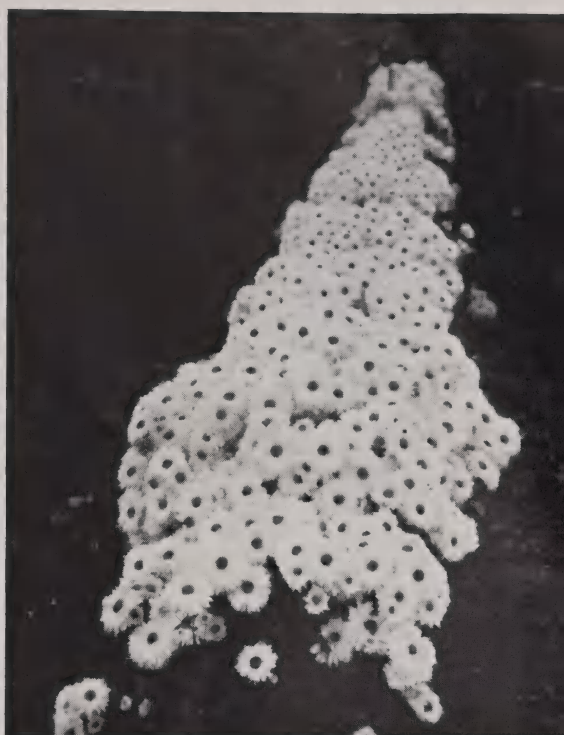

(Patent applied for)

This beautiful new pompon is a real addition to the large late pink class. It is an attractive shade of shell pink which does not fade as so many pinks do. The large full double solid flowers three inches or more in diameter are carried on long straight stems. The plant grows well and produces many breaks per plant which do not come blind even with abnormally late cutting. We have had cuttings planted as late as August 15th bloom well. This new variety may be grown as a spray or as a disbud. Normal blooming is about December 20th but by cutting late or growing cold blooming may be withheld for several weeks.

In order to protect our customers we are patenting this new pompon which prohibits the sale of cuttings. After purchasing, however, one may produce as many cuttings as is necessary for his own use only. None are permitted to be sold or given away. Rooted cuttings are available at \$15.00 per hundred, \$125.00 per thousand.

KRAMERS LATE WHITE

KRAMERS LATE WHITE

KRAMER'S LATE WHITE

(Plant Patent No. 489)

White is always the best seller in the late pompon period. Here we have a good clear white single that has not been beaten in production by any other late pompon with which we are familiar. It has quality, too. The flower is composed of six or eight rows of petals making up a good substantial flower. Stems are rigid and soft enough to take up water well, and the flower spray is such that they bunch nicely.

Plant patent number 489 has been issued for this variety which allows sales with the usual patent restrictions. Cuttings may be produced for one's own use but selling or giving away of cuttings is prohibited. This variety shall not be allowed in any way to pass into the hands of others.

Blooming may begin as early as December 20th, but is common to have the flower crop mature in mid-January.

Cuttings this year are at \$12.00 per hundred, \$100.00 per thousand.

FIELD ROW OF KRAMER'S LATE WHITE

This photograph was taken of a single row of Kramer's Late White on December 20th. The cuttings were planted in the field July 15th, cut back once on September 5th. It was not given any special attention but the growth far exceeded all other varieties, there being 10 to 12 flower stems per plant, all well flowered and making a height of $2\frac{1}{2}$ to $3\frac{1}{2}$ feet. The flowers began to show color December 10th, but were not ready to cut until December 20th, just as this photograph indicates. By pinching back even later, as is possible, maturity can be made later if desired. Last year we had equally good crop coming the 10th of January.

The cuttings of this variety are available this year with patent restrictions. See page 13 for further description and prices.

NEW INTRODUCTIONS

(Descriptions by introducers)

APRICON—An intermediate apricot yellow pompon possessing excellent form and substance. Matures November 25 on rigid stems of medium height when planted in late June and pinched about August 10. Flowers are two inches in diameter opening slowly to allow extension of blooming period. Production is good. Keeps, ships, and bunches extremely well.

DARK PINK FRIEDA—The striking color combination of its deep pink rays and the clear yellow anemone center make this an unusually distinctive flower. Because of its growth characteristics which are identical with those of its parents, Frieda, this variety will no doubt surpass all others in this color class.

VIBRANT—A large decorative pompon. Matures about December 20. Color is a brilliant deep lemon-yellow. Flowers attain a diameter of about 2½-3 inches when fully developed. A vigorous grower. Very productive. Well suited to either raised bench or ground bed culture. Does not come blind. Makes a fine spray from an August pinch. An outstanding late yellow pompon.

WHITE FRIEDA—Clear white ray florets with lemon-yellow anemone center identical with that of its parent variety, Frieda, make this an invaluable addition to the list of white anemones for both normal flowering and for shading purposes. In all respects except color this variety is identical with Frieda.

WINTERSET—An intermediate, lemon-yellow pompon which blooms December 25. Attains a diameter of 2 inches and possesses good substance. Of medium height from June planting with an August 5 pinch. Well suited to ground bed culture. Has a good growth habit. The latest of yellow pompons.

YELLOW ARCADIA—This sport from this well known variety will be a favorite with growers who have been looking for a good early yellow pompon. It is identical to Arcadia in every respect excepting in color which is a true Pernet yellow. It has proven an excellent variety for shading, maintaining its good color without fading. Its excellent form and its pleasing color makes this variety very desirable. Matures normally October 25.

Prices of the above new varieties are \$7.00 per hundred,
\$65.00 per thousand.

OUR 1941 VARIETIES

ESTHER RUTH

PINK PERFECTION

KRAMERS ROSE

SANTA ANITA

ESTHER RUTH—This light bronze color is one that sells well, especially on the late market. Esther Ruth is a large single flower with four or five whorls of petals opening flat and showing a neat center. The flower texture is hard such as is required for good shippers. It grows easy and stems are good. Blooms November 25th.

PINK PERFECTION — From our large field of seedling pompons we have selected this beautiful deep pink as especially attractive, and it is one that has attracted attention from florists visiting our fields. It is a large decorative type three to four inches across with ten to twelve rows of petals, the outer ones being slightly reflexed. There is a tendency toward fasciation of the terminal bud which may be removed if desired. They are at their best about November 25th.

KRAMER'S ROSE—This is another fine large daisy pompon for the late season. The color is a good clear deep rose. Production is good, and growing habits are excellent. You will be proud to grow this variety. Blooming date, November 20th.

SANTA ANITA—A distinct improvement over the well known and popular Ida Catherine Skiff, being much like it in color and form, but much more prolific and a taller grower. It is a nice clear medium bronze single. It may be grown as a pompon or a China mum. Blooms October 25th.

Prices for rooted cuttings of the above varieties are at \$7.00 per hundred, \$65.00 per thousand, delivered to you. 250 are at the thousand rate.

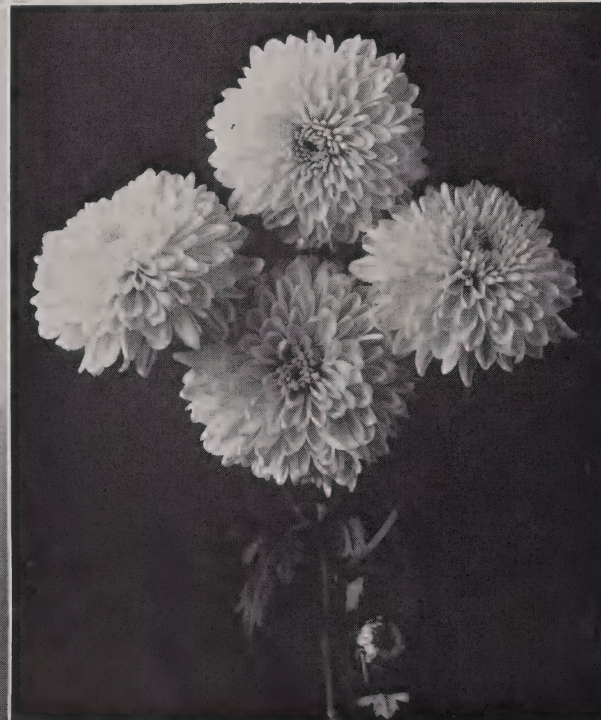

CALIF. NAGONA DAISY

KRAMER'S MORI APRICOT

MARIE KRAMER

SAN DIEGO

CALIFORNIA NAGONA DAISY—This is one of the best single whites grown in California. It is large and has several whorls of broad white petals slightly reflexed at the tips. In growth habits it is vigorous and upright with good stiff flower stems and open flower arrangement. Good for shading. Blooms October 25th.

KRAMER'S MORI APRICOT—One of the largest singles in commercial use is this deep apricot colored variety well known in the California markets. When disbudded and grown four or five to a plant they will measure five or six inches in diameter. When grown for spray pompons it is best to nip out the center bud as the large sized flowers look crowded otherwise. There are five or six whorls of petals which open out flat, making a very substantial looking flower. The center is slightly green. Especially good for shading. Blooms October 25th.

MARIE KRAMER—Really good red pompons which do not fade are in good demand, especially so in the December season at which time Marie Kramer comes to bloom. We believe we have a real asset in the red class. Marie Kramer is a Hasegawa Poinsettia hybrid of deep poinsettia red very similar to that of its parent; just as attractive and just as prolific. The flowers maintain their deep red shade even in full sunlight. One distinct advantage over Hasegawa Poinsettia is its keeping quality. The stems are much more tender and water absorbing, and the flower itself smaller and fuller, there being several whorls of petals. You will find Marie Kramer a good red for December sales. Blooms December 1-10.

SAN DIEGO—Here is a good late yellow pompon of good substance. Flowers of rich yellow two to two and one-half inches in diameter are borne on strong free branching stems. The variety is very prolific and will produce good quantities of flowers late in the mum season. Blooms December 10-15.

Prices for rooted cuttings of the above varieties are at \$4.00 per hundred, \$35.00 per thousand delivered to you. 250 are at the thousand rate.

KAINO PINK

CALIFORNIA PRIDE

KAINO PINK—This is a good solid pompon of the lovely Valencia pink shade. It is fully double, two and one-half inches or more in diameter when grown as a spray, or four or more inches when disbudded. There is no wonder that it is so much called for by the shippers as it holds its shape well and does not shatter. It grows easily. Cutting may begin about November 25th. Cuttings are at \$4.00 per hundred, \$35.00 per thousand.

CALIFORNIA PRIDE—Many commercial growers here like this good deep pink pompon. It is a good large full double with pleasing characteristics. It produces heavily, cuts easily, and makes up nice bunches. Blooms November 15th. Cuttings are at \$4.00 per hundred, \$35.00 per thousand.

KRAMER'S DARK PINK VALENCIA—A number of sports of the well known and popular Valencia are on the market, among which this California production ranks well. It has all the good characteristics of Valencia with the added advantage of a much deeper pink color. It is also a better grower. It blooms several days later than Valencia. Cuttings are at \$4.00 per hundred, \$35.00 per thousand.

SNOW—This very popular new late white pompon has been a very good item with many florists. It is a small full double ball type of solid composition well adapted to commercial use. Production is good and growth vigorous. You can have Snow come in about as late as any pompon on the market. Listed blooming date December 30. The price now is \$4.00 per hundred, \$35.00 per thousand.

TREASURE ISLAND

CALIFORNIA GOLD

TREASURE ISLAND, WHITE, YELLOW, PINK—The Treasure Islands have made good. The three forms, white, yellow and pink, are identical except for color. They are classed with the large decorative pompons, being three inches or more across and full double. Good strong plants cut back in September will come to bloom just in time for Christmas, and you won't have to worry about short stems. These three varieties are grown extensively here for the floats in Pasadena's Tournament of Roses on New Year's day. Use all three colors, yellow, white and pink. Everyone should have these new additions for their late pompon crop. December 20th and later. Now regular price, \$3.00 per hundred, \$27.50 per thousand, delivered to you.

CALIFORNIA GOLD—A single yellow of good deep color and good substance. Flower petals are borne regularly as if placed around a golden center. Nice heads with strong stems are characteristic. Blooms from November 15th. \$3.00 per hundred, \$27.50 per thousand.

CORDOVA

HASEGAWA PINK

GLADYS DUCKHAM

HASEGAWA GOLD

\$3.00 per hundred, \$27.50 per thousand.

LIGHTHOUSE

LIGHTHOUSE—This single pompon is so striking it is one of the first to be recognized in the field. Flowers are of watermelon red shading to a clear bronze make a pleasing and graceful effect. Production is well above the average; free blooming with ample stem and foliage. It has been universally popular because it is a money maker. You should have this single variety. It may be shaded with good success. Blooms November 1-15. Cuttings of this variety are now at regular price, \$3.00 per hundred, \$27.50 per thousand.

STRELITZIA REGINAE, Bird of Paradise—

Blooming Divisions\$2.50 each
 Large Clumps—4 or more blooms..... 5.00 each

LATE DOUBLE STEVIA—Grow this late variety along with your regular plantings of Stevia to lengthen the blooming period. It makes an excellent filler, grows well and is prolific. The double flowers are attractive. Rooted cuttings are \$4.00 per hundred, \$35.00 per thousand.

OUR HEATHER FIELD

Erica Melanthera is the best heather for winter cutting. From our large planting we begin cutting in December, and continue shipments through February. Try a \$5.00 or a \$10.00 box of Kramer Brothers heather this year.
